

# Eight times the difference of y and nine

## Answer 1

Answer:

Eight times the **difference** of y and nine will be  $8(y - 9)$ .

It should be noted that eight times the **difference** of y and nine simply means that one has to **subtract** 9 from y and then **multiply** the difference by 8.

Therefore, eight times the **difference** of y and nine will be  $8(y - 9)$ .

In conclusion, the correct option is  $8(y - 9)$ .
