

$35/4$ square meters by $7/2$ meters

Answer 1

Answer: Area = $35/4$ m²

Length = $7/2$ m

Area = length * width

$35/4 = 7/2 * \text{width}$

$7/2 * \text{width} = 35/4$

width = $35/4 \div 7/2$

width = $35/4 \times 2/7 = 5/2$

Width = $5/2$ m
